

June 8, 2021

As our State is lifting COVID restrictions we are reviewing our operating processes based on the CDC guidelines and the State of Pennsylvania. We are also taking into consideration the vulnerability of our population. SAFETY is our number one core value.

We have determined that we will no longer perform temperature checks upon arrival. We will continue to social distance and keep barriers in our cafeteria areas and production floor, and will continue to require masks on the production floor.

We are currently tracking vaccinated staff and consumers to determine when we will lift the mask requirement.

Please do not hesitate to call with any questions, and continue to check our website for any further information.

Just a reminder

If you are feeling sick, please stay home.

Temperature screening is NOT mandated before an employee enters the business.

Masks are mandatory when working in the building.

Practice social distancing at all times – 3 feet away from each other.
